KALOYAN KOSTADINOV

Full-Stack Software Developer

kaloyan.kostadinov0730@gmail.com | +359 887 563 474 | Pernik, Bulgaria

Personal portfolio website: kaloyan-kostadinov.vercel.app | github.com/LackOfUsernameIdeas | linkedin.com/in/kaloyan-kostadinov-3ab625367

ABOUT ME

Full-stack developer with hands-on experience across web, mobile, AI-driven, and hardware-integrated applications

SKILLS

Languages

TypeScript, JavaScript, Python, Java, PHP, SQL

Frontend & Mobile

React, Next.js, Vite, React Native, Tailwind CSS, shadcn/ui, Bootstrap, A-Frame

Backend

Node.js, Express.js (RESTful APIs), Spring Boot, Socket.IO, Google Cloud Run

Databases & BaaS

MySQL, PostgreSQL, Firebase, Supabase

Artificial Intelligence

LangChain, Vertex AI, OpenAI API, Gemini API

Tools

Git, Docker, Maven, GitHub Actions, Android Studio, Expo Go

Testing

Vitest, Jest, JUnit, Mockito

EDUCATION

Bachelor of Engineering – Computer and Software Engineering

Technical University

Sofia, Bulgaria

2026 – 2030 (Expected)

Secondary Education

Professional High School of Economics

Pernik, Bulgaria

2021 – 2026

LANGUAGES SPOKEN

- Bulgarian - Native
- English - B1/B2 (Intermediate)

Work Experience

Web Development Intern – IB Computers

Jul 2026 – Pernik, Bulgaria

- Helped maintain and improve the company website, including layout and styling adjustments, supporting the company's digital presence alongside its hardware and IT services.
- The company specializes in IT support, computer repair, and network infrastructure services.

Related Skills: *Web and Front-End Development*

Web Development Intern – Silo Works

Jul 2025 – Pernik, Bulgaria

- Given a task to build a simple VR scene demonstrating an immersive experience, with guidance from the development team. This gave me hands-on experience with A-Frame, a framework for building virtual environments, within a company focused on digital twin and BIM solutions.
- This work later served as the starting point of the development of the VR environment in my personal project, MindReel, where I built on and expanded what I had learned by combining different skills and technologies to create a functional implementation.

Related Skills: *A-Frame (Virtual Reality Framework) and TypeScript*

Software Development Intern – Graosoft

Jul 2024 – Pernik, Bulgaria

- Gained exposure to good practices and professional standards in software development through guidance and feedback from Graosoft's development team.
- Discussions covered code quality, team workflows, and career growth in the tech industry.

Related Skills: *Vue.js, TypeScript, and Git*

Featured Projects

Full review, schemes, video demonstrations & documentation: kaloyan-kostadinov.vercel.app

Mobilis

github.com/LackOfUsernameIdeas/Mobilis

- Personalized fitness & nutrition platform that analyzes body composition and personal metrics, delivering personalized calorie targets and macronutrient distribution, along with fitness goals to generate workout recommendations and meal plans
- Target weight achievement prognosis is provided, making long-term progress tracking possible
- Real-time 3D posture correction application using the Orbbec Astra+ depth camera, Nuitrack SDK, OpenCV, and body-proportional calibration algorithms, combining skeletal tracking, vector-based joint angle analysis, and voice-guided corrective exercises with an accuracy validation system

MindReel

github.com/LackOfUsernameIdeas/MindReel

- Recommendation platform that analyzes live EEG brainwave signals (using NeuroSky MindWave Mobile 2) and user preferences in order to understand psycho-emotional state, stress levels, and cognitive performance, then suggests the most suitable movies, TV series, books, and songs
- Recommendation relevance scoring algorithm based on preferred genres, content type, user's mood, available time, release year range, and target audience
- Recommendation quality evaluation using ML metrics: Precision, Recall, F1 Score, Accuracy, Specificity, FPR, FNR
- VR cinema environment in an A-Frame scene, with trailers pulled via yt-dlp on Google Cloud Run

Taskboard

github.com/LackOfUsernameIdeas/Taskboard

- Multi-module task-management REST API built with Spring Boot as a learning exercise, split into three Maven modules (taskboard-core, taskboard-api, taskboard-worker) sharing a single PostgreSQL schema
- Two-stage GitHub Actions CI pipeline running 31 unit tests across all modules, then building and Trivy-scanning the Docker images before smoke-testing the full Docker compose stack
- Standalone background worker that polls the database every 60 seconds for overdue tasks, deployed as a separate Spring Boot process, so it can be deployed, restarted, and scaled on its own
- Stateless JWT authentication with role-based task ownership

NutriFit

github.com/LackOfUsernameIdeas/NutriFit

- Nutrition platform that takes advantage of the capabilities of GPT & Gemini to actively support users in maintaining their optimal weight and healthy lifestyle
- Personalized meal plans generated by both models and evaluated based on their deviation from user-specific calorie and macronutrient targets
- Weight optimization algorithm that compares current and ideal weight based on the user's height and recommends whether to reduce, maintain, or gain weight, with guidance on diet adjustments
- React Native mobile app (separate codebase) consuming the same REST API as the web platform, mirroring the core web features, distributed as a standalone .apk

github.com/LackOfUsernameIdeas/NutriFitMobile *(mobile app repository)*

TikFluence

github.com/LackOfUsernameIdeas/TikFluence

- Data analytics platform that proves TikTok's influence on songs' popularity through cross-platform trend comparison (TikTok, Spotify, YouTube)
- OAuth-based TikTok API integration with real-time statistics via Socket.IO/long-polling architecture
- Growth detection algorithm identifying songs with increasing popularity based on recent and historical data

Achievements

National Olympiad in Information Technologies (НОИТ)

2025 MindReel — **5th place · Grade: 5.75**

2024 NutriFit — **4th place · Grade: 5.75**

2023 TikFluence — **4th place · Grade: 6.00**

National Autumn Tournament in Information Technologies (НЕТИТ „Джон Атанасов“)

2024 NutriFit — **1st place**

2023 TikFluence — **2nd place**
